### **Designed for:**

- *Data storage*; use all your data, like business information and digital photos, videos, MP3s and all other files directly from the drive
- *File sharing*; share all your important data between computers and networks
- *Backup*; protect all your data against calamity, human errors and virus infections
- *Archiving*; archive all your data and lock up drive for extra data security
- *Installations*; copy all your software on multiple PCs

## **One button data-synchronization**

If you frequently work on files away from your main computer (using your home PC or your notebook on the road, for example), you can use the SYNC button together with the Freecom SYNC software (uses Microsoft Briefcase) to synchronize files when you have finished working on them. When you reconnect your FHD-2 PRO to your main computer and press the SYNC button, the Freecom SYNC software automatically detects if files have been changed and prompts you to update these files on your computer or network to the modified versions. You'll always have the latest information you need!

## ACRONIS TRUE IMAGE SOFTWARE

### THE ULTIMATE DATA INSURANCE POLICY!

The Freecom FHD-2 Pro with Acronis True Image software is your ultimate data insurance policy! The software takes an exact image of your hard disk drive or separate partitions for complete backup and allows you to restore all of their contents, including operating systems, programs, personal data and settings. In the event of fatal software or hardware failure Acronis True Image protects your data, even when ordinary file backup software does not work. True Image is designed for Windows and available English only.
