

8GB SECRETS

You always should carry your most valuable things with you. Data these days also represent value. Photos, music, confidential files from work..... Exactly with this in mind we developed the USBCard. Patented technology, by Freecom. Thin enough to put in your wallet, large enough to all of your secrets. Always have your data with you, wherever you go. A safe feeling!

USB CARD

USB STICK IN CREDIT CARD FORMAT / USB 2.0
WIN & MAC

USB flash storage enters a new dimension

- Save your data on a credit-card-like device that you won't lose easily
- Carry your precious data in your wallet with all your other valuables
- Smart solution at an affordable price for business users and trend setters

Innovative Data Storage

- Thinnest USB flash storage device in the market - only 2 mm
- Flat USB connector clicks inside the card
- Up to 8GB storage space
- Including Carry It Easy™ Software (password protection, no trace internet browsing & Outlook, Favourites and My Documents synchronization features)
- Carry It Easy™ for Windows 2000/XP/Vista comes pre-installed on the USBCard and does not require any driver installation

Innovative Data Storage

- Equip your staff with your corporate USBCard
- Amaze your customers with a customized high-tech present
- Easiest and smartest tool for cost effective brand building
- Fully customizable*: logo, pre-installed presentations or files which automatically start

Who leaves home without a wallet? No one!

On the way to friends or on a business trip, whether you have time or when you are in a hurry, you never forget your wallet. Thanks to Freecom USBCard you will never forget your data either. Your files will follow you wherever you go. Don't even think about it, the files are in your wallet!

Freecom USBCard sets a new standard in mobile storage. The USBCard adopts the most accepted form factor in the world, a credit card! It is as thin and compact as a common credit card, fits in any wallet or card holder and stores up to 8GB data.

Both the form factor and the technology used in Freecom USBCard represent innovation. All electronics have been embedded into the ultra slim USB connector which is integrated in the USBCard and can easily be clicked out to be plugged into any PC/Notebook USB port. The data is securely stored into the electronic part of the USB connector and remains safe even if the card gets damaged.

Keep it Simple...

* Ask your Freecom account manager for your own design and for minimum order quantities & possibilities

CARRY IT EASY™ SOFTWARE:

Personal: Carry it Easy™ helps you to take all your personal data wherever you want to go. Send and receive e-mails from any computer that runs Windows 2000 or XP. Have your favorite links with you and access them from any computer, the regular way or with No Trace Browsing. Work anywhere you want and carry your files with you with just a few clicks. All this comes with an interface available in 7 languages.

Private: Carry it Easy™ password-protects your data from unwanted access. Still, if you lose your USBCard the finder can see your contact details but can't see the password protected files. Carry it Easy™ also offers the No Trace Browsing function so all the data related to Internet surfing (Cookies, Cache, History) is stored on the USBCard and can be deleted afterwards.

Easy to use: Everything is simple when using Carry it Easy™. The friendly and appealing interface and functions couldn't be easier to use; from the intuitive initial configuration process to the No Trace Browsing every step takes only a few clicks.

PACKAGE INCLUDES:

- Freecom USBCard
- Carry It Easy™ password protection & encryption software (no drivers needed, software runs directly from the device itself!)
- One year manufacturers warranty (register online at www.freecom.com/USBCard)
- Preloaded/installed on the USBCard: Carry It Easy™ software for Windows + manual PDF in 7 languages (UK, D, NL, I, E, F, PL)
